

DEOWASH SYSTEM

by HygienFresh®

Wool and Delicates

DEOWASH SYSTEM · Wool and Delicates

THE COMPLETE WASH SYSTEM FOR WOOL

DeoWash Lana has been developed to guarantee wool and delicate fibres are thoroughly cleaned and protected while leaving the garments soft and lightly scented.

DEOWASH SYSTEM · Wool and Delicates

THE SYSTEM IS DIVIDED INTO 2 PHASES:

PHASE 1

- **HYGIENFRESH® DELICATI & LANA:**

The detergent is extremely mild on wool and delicate fibres. The buffered pH system ensures that the fibres are protected during the wash to reduce felting. Delicati & Lana also contains Lanolin, the natural fat found in wool, which ensure the fibres remain soft during the wash.

PHASE 2

- **HYGIENFRESH® SFELTRIX:**

This specialised finishing agent contains silk protein extracts which protect and regenerate the fibres to prevent wool felting. With the same “Rose Milk” fragrance as the detergent it gives a delicate but long lasting fragrance.

DEOWASH SYSTEM · Wool and Delicates

DON'T LIMIT YOURSELF TO JUST WASHING WOOL...

**Regenerate it
Soften it
Protect it
Fragrance it**

...and feel the difference!
